Northwind Analytics — Company Overview

Last updated: 20 August 2026
Source: internal company handbook, PDF export

Northwind Analytics is a private company incorporated in 2017. It builds data warehousing and anomaly detection software for mid-market finance teams. The company is headquartered in Bristol, United Kingdom, with a second engineering office in Porto, Portugal.

The company was co-founded by **Priya Raghavan**, who has served as Chief Executive Officer since incorporation, and Tomas Lindqvist, who joined as Chief Technology Officer in 2018.

As of the third quarter of 2026 Northwind employs 180 people. Roughly half of them work in engineering. The company has raised two rounds of venture funding, most recently a Series B of 34 million pounds in March 2025, led by Thornbury Capital.

Northwind has never been acquired and remains independently operated. It has no publicly traded shares.

Security reports and compliance enquiries are handled through the coordinated disclosure process described in the internal security handbook.
